<https://ab-etemadi.github.io/ab/>

Focused professional having excellent technical and communication skills. Proficient at designing and writing code in various languages, feature development and implementation. Specialize in thinking outside the box to find unique solutions to difficult engineering problems.

Skill Highlights

Backend Development:

- NestJs and Node.js for robust and scalable apps.
- API development (REST and GraphQL) for efficient communication.
- SQL databases (MySQL, AuroraDB) for effective data handling.
- Familiar with Apollo Federation for distributed GraphQL.

Frontend Development:

- React and Next.js for engaging, responsive interfaces.
- Tailwind CSS, HTML, and CSS for appealing, user-friendly designs.

AWS Services:

- Experienced with EC2, AuroraDB, CloudFormation, ECS, S3, Timestream, and CloudWatch. Efficiently architecting, deploying, and monitoring cloud-based apps.

Testing:

- Skilled in using Jest, a powerful JavaScript testing framework, to ensure the quality and reliability of code.

Other:

- Familiarity with New Relic for app performance optimization.
- Experience in Shopify integration for enhanced e-commerce platforms.

Work History

2021-11 - Current

Software Engineer

Taglet Company, United States (Remote)

As a Software Engineer at Taglet, I specialize in both backend and frontend development, contributing to the success of projects by leveraging a wide range of technologies and services. My role encompasses a diverse set of skills, including proficiency in backend development, frontend technologies, and AWS services. Here's an overview of my expertise:

- Responsible for developing GraphQL and Restfull APIs using Nestjs
- Responsible to write unit test and functional test using jest
- Responsible for adding new features and resolving bugs on existing project using NextJs
- Worked with backend and frontend teams

Education

2018-06 - 2024-06

Bachelor of Science: Computer Application

Herat University - Herat

High School Diploma

Sultan Ghiyath Al-Din Ghuri - Herat
